- DIRECT APPLICATIONS AND EUIN :**
 - Investment in Direct Plan: Investors applying under Direct Plan, are advised to write the word 'DIRECT' in the column 'ARN No' or 'Broker Code' in their applications for purchases/additional purchases/switches in all such cases where applications are not routed through any distributor/ agent/broker. In cases where unit holder uses a pre-printed transaction slip/application form where details in the 'ARN No' or 'Broker Code' column is already printed, unit holder should cancel the ARN No/ Broker Code, write 'DIRECT' in the said column. Also, in case ARN No/ Broker Code is mentioned in the application form, but 'Direct Plan' is indicated, the ARN No/ Broker Code will be ignored and the application will be processed under Direct Plan, subject to it being complete in all other aspects. Further, where application is received for Regular Plan without Distributor code or "Direct" mentioned in the ARN Column, the application will be processed under Direct Plan.
 - Employee Unique Identification Number (EUIN) is a unique number allotted to Sales personnel i.e. employee/ relationship manager/ sales person of the distributor interacting with the investor for the sale of mutual fund products. Such sales personnel associated with Distributor, should also be holding a valid NISM certificate. Thus, in case of applications routed through distributors, in addition to the AMFI Registration Number (ARN) of the distributor, Investors are requested to also provide the EUIN of the individual ARN holder or of employee/relationship manager/sale person of the Distributor interacting with the investor. Providing appropriate EUIN in the application/transaction forms would assist in tackling the problem of misselling even if the Sales personnel on whose advice the transaction was executed by investor leaves the employment of the distributor or his/her sub broker. If the distributor has not given any advice pertaining to the investment (i.e. transaction is 'execution only'), then the EUIN box may be left blank, but it would be mandatory for the investor to provide confirmation as mentioned in the application form.

a. Value STP is a facility wherein Unit holder(s) can opt to transfer variable amounts into the Transferee Scheme from the Transferor Scheme on the date of transfer at predetermined intervals. The amount to be transferred will be arrived at on the basis of the difference between the Investment Value [(first installment amount) X (number of instalments; including the current installment)] and the actual Market Value of the holdings in the Transferee Scheme on the date of transfer.
b. The first Value STP installment will be processed for the first installment amount specified by the Unitholder at the time of enrolment. From the second Value STP installment onwards, the transfer amount may be higher or lower than the first installment amount, as derived by the formula stated below:
[(First installment amount) X (Number of instalments including the current installment)] - (Market Value of the investments through Value STP in the Transferee Scheme on the date of transfer)
c. On the date of transfer, if the market value of the investments in the Transferee Scheme through Value STP is higher than the Investment Value for that month [(first installment amount) X (number of instalments; including the current installment)], then there would be no transfer effected from the Transferor Scheme.
d. If the amount of transfer as calculated by the above formula is less than Rs.500, then the default amount of Rs. 500 will be transferred to the Transferee Scheme. However, in case of redemption or switch-out of Units allotted under Value STP in the Transferee Scheme, the balance instalments under Value STP will be processed for the fixed instalment amount only as specified by the Unitholder at the time of enrolment.

Calculation of Value STP amount of the second installment i.e. 16-Feb-15:

- First Installment Amount- Rs. 10000/-
 - Number of instalments including the current installment is 2
 - Total of 63.3995 units allotted up to the date of last installment i.e. January 2015 in ABSL Front Line Equity- Growth. The NAV of ABSL Front Line Equity- Growth on February 16, 2015 is 167.92/- per unit. Hence the market value of the investment in ABSL Front Line Equity- Growth on the date of transfer is Rs. 1,0646.04 [167.92 X 63.3995].
 - Amount Derived for second installment Amount from the formula - [(First installment amount) X (Number of instalments including the current installment)] - (Market Value of the investments through Value STP in the Transferee Scheme on the date of transfer) is - [(Rs 10000) X 2] - Rs. 10,646.04 = Rs. 9,353.96
- Capital Appreciation Transfer Plan**
Capital Appreciation Transfer Plan is a facility wherein the Unitholders can opt for the Systematic Transfer Plan by providing instruction to transfer capital appreciation at regular intervals - Monthly or Quarterly under the open-ended Scheme(s) of the fund (except Aditya Birla Sun Life Gold ETF and Aditya Birla Sun Life Nifty ETF).
a. Capital Appreciation Transfer Plan is a facility wherein the Unitholders can opt for the Systematic Transfer Plan by providing instruction to transfer capital appreciation at regular intervals - Monthly or Quarterly under the open-ended Scheme(s) of the fund (except Aditya Birla Sun Life Gold ETF and Aditya Birla Sun Life Nifty ETF).
b. The transfer shall take place at a defined time on a periodic basis.
c. The minimum amount required to trigger instalment under Capital Appreciation Transfer Plan is Re. 1 and in multiples of Re.1 thereafter
d. The capital appreciation, if any, will be calculated from the registration date of the Capital Appreciation Transfer under the folio, till the first transfer date. Subsequent capital appreciation, if any, will be the capital appreciation between the previous successful Capital Appreciation Transfer date (where Capital Appreciation Transfer has been processed and paid) and the next Capital Appreciation Transfer date. Appreciation will be calculated on the units available for transfer at the time of STP instalment.
e. Capital Appreciation Transfer Plan is offered at Monthly and Quarterly intervals. In case none of the frequencies have been selected or in case of any ambiguity, Monthly frequency shall be treated as the default Frequency. If STP date is not specified or in case of any ambiguity then 7th Business Day of the month will be treated as default date. In case the date of transfer falls on a Non-Business Day, the immediate next Business Day will be considered for the purpose of determining the applicability of NAV.
f. A Single Capital Appreciation Transfer Enrolment Form can be filled for transfer into only one Scheme/Plan/Option.
g. Unitholder has the right to discontinue Cap STP at any time he/ she so desires by sending a written request at least 7 (seven) days in advance to any of the offices of the Fund or its Authorised Collection Centres.
h. Capital Appreciation Transfer Plan will be terminated / not processed under the following circumstances: (i) On marking of lien or pledge of Units in the Transferor Scheme (ii) On receipt of intimation of death of the Unitholder.

Quarterly Systematic Transfer Plan: Transfers can be on 1 or 7 or 10 or 14 or 20 or 21 or 28 of each quarter for minimum 4 quarters.

- Fast Forward Facility:** Investors availing monthly STP facility can opt for multiple dates, maximum upto any four dates within a month and in this case the dates can be dated 1st and /or 7th and /or 10th and/or 14th and/or 20th and/ or 21st and/ or 28th of each month.
- Default Dates:**
Monthly/Quarterly: In case of any ambiguity in selection of transfer frequency, the STP date will be 7 of each month / quarter. In case where more than 4 dates are specified, default dates will be 7, 14, 21 & 28 of each month.
Weekly: In case of any ambiguity in selection of transfer frequency, the STP day will be as 'Wednesday'.
- Minimum Application Amount' specified in the SID(s) of the respective designated Transferee Scheme(s) will not be applicable for STP registration.
- Daily STP
a) There will be no maximum limit on number of transfers/duration for Daily STP enrolment. In case, the investor fails to specify the number of transfers/duration under Daily STP, transfers shall continue to be triggered perpetually or until further valid instructions from the investor until the outstanding balance in "Out" scheme does not cover the Daily STP transfer amount. The minimum amount for fresh/additional purchases as per subscription rules of "In" scheme shall not be applicable to Daily STP triggers.
b) Daily STP shall not be available under Monthly Systematic Transfer Facility (STP) For Aditya Birla Sun Life Century SIP.
c) Only one Daily STP would be allowed per Plan/Option of the Source Scheme into a distinct Target Scheme. For e.g.: In case Daily STP exists from 'Scheme A-Growth option' into 'Scheme B-Growth
- Value STP**
a. Value STP is a facility wherein Unit holder(s) can opt to transfer variable amounts into the Transferee Scheme from the Transferor Scheme on the date of transfer at predetermined intervals. The amount to be transferred will be arrived at on the basis of the difference between the Investment Value [(first installment amount) X (number of instalments; including the current installment)] and the actual Market Value of the holdings in the Transferee Scheme on the date of transfer.
b. The first Value STP installment will be processed for the first installment amount specified by the Unitholder at the time of enrolment. From the second Value STP installment onwards, the transfer amount may be higher or lower than the first installment amount, as derived by the formula stated below:
[(First installment amount) X (Number of instalments including the current installment)] - (Market Value of the investments through Value STP in the Transferee Scheme on the date of transfer)
c. On the date of transfer, if the market value of the investments in the Transferee Scheme through Value STP is higher than the Investment Value for that month [(first installment amount) X (number of instalments; including the current installment)], then there would be no transfer effected from the Transferor Scheme.
d. If the amount of transfer as calculated by the above formula is less than Rs.500, then the default amount of Rs. 500 will be transferred to the Transferee Scheme. However, in case of redemption or switch-out of Units allotted under Value STP in the Transferee Scheme, the balance instalments under Value STP will be processed for the fixed instalment amount only as specified by the Unitholder at the time of enrolment.
e. The total amount invested through Value STP over its tenure in the Transferee Scheme, may be higher or lower than the Total Investment Value of the investment i.e. the [(first installment amount) X (total number of instalments specified by the Unitholder)]. This may be on account of fluctuations in the market value of the Units of the Transferee Scheme.
f. The maximum amount of transfer under this option would be limited to twice the amount per transfer specified in the application form.
g. The frequencies available under this facility are as follows: Monthly & Quarterly
h. The minimum number of instalments and amount for enrolment to avail Value STP are as below:

Frequency	Trigger Dates	Minimum Value STP amount (Rs.)
Monthly	1 st , 7 th , 10 th , 14 th ,	For STP installments greater than ₹ 500 but less than ₹ 999, Unitholders are required to instruct for minimum 12 transfers of ₹ 500 and in multiples of ₹ 1 thereafter.
Quarterly	20 th , 21 st , 28 th	For STP installments of ₹ 1000 and above, Unitholders are required to instruct for minimum 6 transfers of ₹ 1000 and in multiples of ₹ 1 thereafter.

- In case none of the frequencies have been selected or in case of any ambiguity, Monthly frequency shall be treated as the default Frequency. If STP date is not specified or in case of any ambiguity then 7th Business Day of the month will be treated as default date.
- In case the date of transfer falls on a Non-Business Day, the immediate next Business Day will be considered for the purpose of determining the applicability of NAV.
- In case of valid enrolment forms received, indicating choice of option other than the Growth Option in the Transferee Scheme, it will be deemed as the Growth Option in Transferee Scheme and processed accordingly.
- A Single Value STP Enrolment Form can be filled for transfer into one Scheme/Plan/Option only.
- Unitholder has the right to discontinue Value STP at any time he/ she so desires by sending a written request at least 7 (seven) in advance to any of the offices of the Fund or its Authorised Collection Centres.
- Value STP will be terminated / not processed under the following circumstances: (i) On marking of lien or pledge of Units in the Transferor Scheme (ii) On receipt of intimation of death of the Unitholder

Performance will depend on the Asset Management Company's ability to assess accurately and react to changing market conditions. While it is the intention of the Scheme to maintain the maximum exposure guidelines provided in the table above there may be instances when these percentages may be exceeded. Typically, this may occur while the corpus is small thereby causing diversification issues.</p> <p>No more than 5% of the net assets of Aditya Birla Sun Life Monthly Income may be invested in equity and equity-related securities that are not listed on any stock exchange (including the OTCEI). The Trustee of the Mutual Fund may from time to time alter these limitations in conformity with the SEBI (MF) Regulations, 1996 and other guidelines or notifications that may be issued by SEBI.</p>	Instrument	Maximum Exposure	Risk Profile	Government of India Securities	90%	Sovereign	Call Money and Treasury Bills	60%	Low	Corporate Debt	75%	Medium-High	State Government Bonds	50%	Low	Commercial Paper	50%	Medium-High	Certificate of Deposit	50%	Low- Medium	Discounted Trade Bills	50%	Low- Medium	Asset Backed securities	50%	Low- Medium	Government Guaranteed Bonds	50%	Low	Public Sector Undertaking Bonds	50%	Medium	Financial Institution & Banking Sector Bonds	50%	Low- Medium	Equity Securities	15%	High	Units issued by REITs & InvITs	10%	Medium-High

Asset Allocation Pattern of the Scheme	<p>The Scheme is an income scheme and aims primarily at the steady generation of income. Considering this, normally the funds will be invested in fixed-income securities that encompass both short-term and long term considerations.</p> <p>Under normal circumstances, it is expected that investing in long-term debt instruments of good quality will enable the scheme to earn competitively high yields for a sustained period. Short-term debt considerations for this open ended scheme include maintaining an adequate float to meet anticipated levels of redemptions, expenses, and other liquidity needs. A portion of funds may also be kept in cash or cash equivalents.</p> <p>Fixed income investments may be in listed or unlisted instruments, as per SEBI guidelines. Investments will be in listed securities from any of the Indian Stock Exchanges including the National Stock Exchange and the OTC Exchange of India. Investments may also be made in unlisted transferable securities. The securities would cover secondary market purchases, Initial Public Offers (IPOs), other public offers, placements, rights offers, negotiated deals, etc. Investment policies of the Fund shall reflect restrictions for mutual fund investments established by SEBI. In addition, certain investment parameters (such as limits on portfolio exposure to sectors, industries, business houses etc) may be adopted internally by AMC, and amended from time to time, to ensure appropriate diversification of the portfolio.</p> <p>Under normal circumstances, the asset allocation of the Scheme will be as follows: (as a % of net assets)</p> <table> <tr> <th>Instruments</th><th>Asset Allocation</th><th>Risk Profile of the Instrument</th></tr> <tr> <td>Debt and Money Market Instruments</td><td>90% - 100%</td><td>Low to Medium</td></tr> <tr> <td>Units issued by REITs & InvITs</td><td>0-10%</td><td>Medium to high</td></tr> </table> <p>The Scheme may invest a maximum of 40% in securitised debt.</p> <p>The scheme may also invest upto 50% of the portfolio (i.e. net assets including cash) in such derivative instruments as may be introduced from time to time subject to framework specified by SEBI, for the purpose of hedging and portfolio balancing and other uses as may be permitted under SEBI Regulations.</p> <p>Under normal circumstances this scheme shall not have an exposure of more than 15% of its net assets in foreign securities. However, the AMC with a view to protecting the interests of the investors, may increase exposure in foreign securities as deemed fit from time to time</p>	Instruments	Asset Allocation	Risk Profile of the Instrument	Debt and Money Market Instruments	90% - 100%	Low to Medium	Units issued by REITs & InvITs	0-10%	Medium to high	<p>The following table provides the asset allocation of the scheme's Portfolio (as a % of net assets)</p> <table> <tr> <th>Type of Securities/ Instruments</th><th>Asset Allocation</th><th>Risk Profile</th></tr> <tr> <td>Debt and Money Market Instruments</td><td>0-100%</td><td>Low to Medium</td></tr> <tr> <td>- Out of which:</td><td></td><td></td></tr> <tr> <td>Securities with less than 3 Years residual maturity</td><td>80%-100%</td><td>Low to Medium</td></tr> <tr> <td>Securities with less than 5 Years residual maturity</td><td>0-20%</td><td>Low to Medium</td></tr> </table> <p>Average maturity of the scheme shall be of 1 to 3 years</p> <p>The Fund Manager will review the portfolio for adherence with the above asset allocation pattern and rebalance the same within 30 days to conform to the above limits.</p> <p>Investment objectives of the Scheme are proposed to be achieved by investing, under normal market conditions, 100% of the corpus in a diversified portfolio of debt (fixed income) and money market securities. The Scheme retains the flexibility to invest across all of the various securities and other instruments in the debt and money markets. From time to time it is possible that the portfolio may hold cash.</p> <p>Investment policies of the Scheme comply with the rules, regulations and guidelines laid out in the SEBI Regulations 1996, specifically the Seventh Schedule. All of the Scheme's assets will be invested in transferable securities. The corpus of the Scheme shall not in any manner be used in option trading, short selling or carry forward transactions as stipulated in SEBI Regulations and amended from time to time.</p> <p>All the investments by the Mutual Fund under the scheme shall be guided by investment restrictions as specified in SEBI (Mutual Funds) Regulations, 1996 from time to time.</p> <p>Investments in debt and money market instruments will be made in securities rated as investment grade by atleast one recognised rating agency. Investments in unrated securities will be made with the prior approval of the Boards of Directors of the Trustee Company and the Asset Management Company or a committee thereof.</p> <p>The Scheme reserves the right to invest in newer investment products including foreign debt (i.e. offshore investments) subject to approval of the Trustee Company and in compliance with the applicable SEBI Regulations.</p> <p>Under normal circumstances the scheme shall not have an exposure of more than 25% of its net assets in foreign debt securities subject to overall cap as specified by SEBI.</p> <p>Under normal market conditions, the Scheme will be managed so as to maintain a Rupee weighted average duration not exceeding five years.</p> <p>Individual investments may have maturity less than, equal to or greater than five years. The portfolios are expected to generate returns by prudently investing in sectors and issues in the debt and money markets, which provide consistently superior yields at low levels of risk.</p> <p>The scheme may also invest upto 100% of the portfolio (i.e. net assets including cash) in such derivative instruments as may be introduced from time to time subject to framework specified by SEBI, for the purpose of hedging and portfolio balancing and other uses as may be permitted under SEBI Regulations. Due consideration will be given to the liquidity of the Scheme's investments keeping in mind that the Scheme is open-ended. Liquidity will be provided through investment allocation, staggering maturities and investing in structured securities. Liquidity will also be managed by opportunistically investing in the call money market when call money yields are attractive relative to other money market yields and by laddering coupon payments and maturities within the Scheme's investments. Additional liquidity will also be provided through borrowing to meet redemptions in accordance with the SEBI Regulations.</p> <p>Investments may be made in listed or unlisted instruments. Securities may be listed on any of the recognised Indian stock exchanges including the National Stock Exchange and the Over the Counter Exchange of India. Investments may be made as secondary market purchases, initial public offers, private placements, negotiated investments, rights offers, etc. The Scheme may enter into securities lending as allowed under the SEBI Regulations.</p> <p>Notwithstanding the foregoing investment policies for the scheme, for temporary defensive purposes (e.g., during periods in which the Asset Management Company believes changes in the securities market or economic or other conditions warrant), the scheme may invest in Indian Government T-Bills and hold cash or cash equivalents and other money market instruments. The Trustee of the Mutual Fund may from time to time alter these limitations in conformity with the SEBI (MF) Regulations, 1996 and other guidelines or notifications that may be issued by SEBI</p>	Type of Securities/ Instruments	Asset Allocation	Risk Profile	Debt and Money Market Instruments	0-100%	Low to Medium	- Out of which:			Securities with less than 3 Years residual maturity	80%-100%	Low to Medium	Securities with less than 5 Years residual maturity	0-20%	Low to Medium

No. of Folios & AUM (As on June 30, 2017)	Folios: 3599 AUM in Crs: ₹ 596.48		Folios: 82114 AUM in Crs: ₹ 13,388.57	
Asset Allocation Pattern of the Scheme	The investment plan will, under normal market conditions, invest its net assets as per the asset allocation hereunder.		Under normal circumstances, the asset allocation of the Scheme will be as follows:	
	(as a % of net assets)		(as a % of net assets)	
	Asset Class	Maximum Exposure	Credit Risk Profile	Instrument
	Government of India Dated Securities	100%	Sovereign	Government of India Securities
	State Governments Dated Securities	100%	Low	Corporate Bonds
	Government of India Treasury Bills	100%	Sovereign	Cash/liquid Instruments including Money Market Instruments & Short Term Debt Papers**
	The Scheme is not a Money Market Mutual Funds scheme as defined by the RBI.		*Since the intention of the Fund is to dynamically manage the asset allocation the percentages would change depending on view on interest rates as well as the level of corporate spreads prevailing at that point in time and also availability of different assets at different point of time.	
	In addition to the securities stated in the table above, the Scheme may enter into repos/reverse repos in the securities that it will invest in or as may be permitted by the RBI. From time to time the Scheme may hold cash. A part of the net assets may be invested in the call money market or in an alternative investment for the call money market as may be provided by the RBI to meet the liquidity requirements. The Scheme reserves the right to invest in newer investment products subject to approval of the Trustee Company and in compliance with the applicable		** The short-term debt papers would have a maturity upto 1 year.	
	SEBI Regulations. Investments may be made as primary market offers, auctions, secondary market purchases, private placements or negotiated investments. Individual investments may have tenors that vary from short-term (i.e. less than one year) to long-term (i.e. ten years or more).		<ul style="list-style-type: none"> The investments in securitised debt papers will normally not exceed 50% of the net assets of the Scheme. Pending deployment of funds of the scheme in securities in terms of the investment objectives of the scheme, the AMC may invest the funds of the scheme in short term deposits of scheduled commercial banks as per the guidelines given in SEBI circular dated April 16, 2007 and such other modifications as may be carried out by SEBI from time to time. The scheme may also invest upto 50% of the net assets of the scheme in such derivative instruments as may be introduced from time to time subject to framework specified by SEBI for the purpose of hedging and portfolio balancing and other uses as may be permitted under SEBI Regulations. The scheme may also invest a part of its net assets (not exceeding 50% of its net assets) in overseas markets in bonds and Mutual Funds and such other debt instruments as may be allowed under SEBI Regulations and RBI Regulations, from time to time. 	
	The scheme may also invest upto 100% of the portfolio (i.e. net assets including cash) in such derivative instruments as may be introduced from time to time subject to framework specified by SEBI, for the purpose of hedging and portfolio balancing and other uses as may be permitted under SEBI Regulations.		Risk Control	
	The portion of the Scheme's portfolio invested in each type of security will vary in accordance with economic conditions, interest rates, liquidity and other relevant considerations, including the risks associated with each investment. Performance will depend on the Asset Management Company's ability to assess accurately and react to changing market conditions.		Investments made by the scheme would be in accordance with the investment objectives of the scheme and provisions of SEBI Regulations. Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. The risk control process involves reducing risks through portfolio diversification, taking care however not to dilute returns in the process. The AMC believes that this diversification would help achieve the desired level of consistency in returns. The AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. With the aim of controlling risks, rigorous in-depth credit evaluation of the securities proposed to be invested in will be carried out by the investment team of the AMC.	
Investment Strategy & Risk Control	For details on Investment Strategy & Risk Control measure please refer Page No. 79.		The Scheme may also use various derivatives and hedging products from time to time, as would be available and permitted by RBI, in an attempt to protect the value of the portfolio and enhance Unitholders' interest.	
Risk Profile of the Scheme	Mutual Fund Units involve investment risks including the possible loss of principal.		For summary of Scheme Specific risk factors please refer Page 75.

Asset Allocation Pattern of the Scheme				The portion of the Scheme's portfolio invested in each type of security will vary in accordance with economic conditions, interest rates, liquidity and other relevant considerations, including the risks associated with each investment. The Scheme will, in order to reduce the risks associated with any one security, utilize a variety of investments. Performance will depend on the Asset Management Company's ability to assess accurately and react to changing market conditions. While it is the intention of the Scheme to maintain the maximum exposure guidelines provided in the table above there may be instances when these percentages may be exceeded. Typically, this may occur when the net assets of the scheme fall below Rs. 30 Crores. The Scheme may enter into securities lending as allowed under the SEBI (MF) Regulations. Notwithstanding the foregoing investment policies for the scheme, for temporary defensive purposes (e.g., during periods in which the Asset Management Company believes changes in the securities market or economic or other conditions warrant), the scheme may invest in Indian Government T-Bills and hold cash or cash equivalents and other money market instruments. The Trustee of the Mutual Fund may from time to time alter these limitations in conformity with the SEBI (MF) Regulations, 1996 and other guidelines or notifications that may be issued by SEBI.

Asset Allocation Pattern of the Scheme	<p>Under normal circumstances, the asset allocation of the Scheme will be as follows:</p> <table><tr><th rowspan="2">Instrument</th><th rowspan="2">Risk Profile</th><th colspan="2">Indicative Allocation (% of total Assets)</th></tr><tr><th>Minimum</th><th>Maximum</th></tr><tr><td>ING (L) Invest Global Real Estate Fund</td><td>High</td><td>95%</td><td>100%</td></tr><tr><td>Money Market Instruments/ liquid funds / money market mutual funds</td><td>Low to Medium</td><td>0%</td><td>5%</td></tr></table> <p>The Scheme intends to predominantly invest in ING (L) Invest Global Real Estate Fund, Under normal market conditions, ING (L) Invest Global Real Estate Fund invests in a diversified portfolio of equities and/or other transferable securities (warrants on transferable securities – up to a maximum of 10% of the Sub-Fund's net assets – and convertible bonds) issued by companies established, listed or traded in any country worldwide and operating in the real estate sector. The Investment Manager will select companies whose main revenue or activity is linked to property, real estate management and/or development.</p> <p>The Sub-Fund may also invest, on an ancillary basis, in other transferable securities (including warrants or transferable securities up to 10% of the Sub-Fund's net assets), money market instruments, units of UCITS and other UCIs and deposits as described in Part III of the prospectus. However, Investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on transferable securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets.</p> <p>All risks associated with such scheme, including performance of their underlying equity portfolio, derivative instruments, off-shore investments etc., will therefore be applicable in the case of the Scheme.</p> <p>In selecting investments, the Manager uses a rigorous portfolio construction process divided into two stages.</p> <p>(1) Firstly, the Manager selects the sectors and regions in which to invest and determines the degree of representation of these sectors and regions by systematically assessing trends and conditions in the public and private real estate markets.</p> <p>(2) Secondly, the Manager uses an assessment process developed by ING to identify investments which currently generate higher income and have higher growth potential than their peers. This assessment process examines various factors:</p> <p>a. value and property;</p> <p>b. capital structure and</p> <p>c. management and strategy.</p> <p>At all times, total exposure of the FOFs/Feeders in Indian equity through underlying fund(s) shall not exceed 15% of the AUM of the concerned Indian scheme. In case such limit is breached, the same shall be rebalanced within a period of three months. In case the exposure in excess of 15% is not rebalanced within a period of three months, the concerned FOF/feeder shall wind up the scheme and provide an exit to investors at the prevailing NAV.</p> <p>As a measure towards rebalancing the excess exposure, the scheme may redeem its part or entire investments from the existing underlying Fund and invest in other similar funds which match the mandate of the Scheme*.</p> <p>*Other similar overseas funds means funds similar in terms of Investment objective, Investment Strategy and</p> <p>Attributes which matches the mandate of the scheme.</p>	Instrument	Risk Profile	Indicative Allocation (% of total Assets)		Minimum	Maximum	ING (L) Invest Global Real Estate Fund	High	95%	100%	Money Market Instruments/ liquid funds / money market mutual funds	Low to Medium	0%	5%	<p>Under normal circumstances, the asset allocation is as follows:</p> <table><tr><th rowspan="2">Instruments</th><th colspan="2">Indicative allocations (% of total assets)</th><th rowspan="2">Risk Profile</th></tr><tr><th>Maximum</th><th>Minimum</th></tr><tr><td>Equity Funds</td><td>49</td><td>34</td><td>High</td></tr><tr><td>Liquid funds, Money Market funds</td><td>40.50</td><td>25.50</td><td>Low</td></tr><tr><td>Debt Funds other than Liquid Funds, Money Market Funds</td><td>32</td><td>17</td><td>Low to Medium</td></tr><tr><td>Gold Exchange Traded Funds</td><td>23.50</td><td>8.50</td><td>High</td></tr><tr><td>Money Market Securities</td><td>15</td><td>0</td><td>Low</td></tr></table> <p>Plan under the Scheme can invest in third party mutual fund Scheme and / or Scheme of Aditya Birla Sun Life Mutual Fund.</p>	Instruments	Indicative allocations (% of total assets)		Risk Profile	Maximum	Minimum	Equity Funds	49	34	High	Liquid funds, Money Market funds	40.50	25.50	Low	Debt Funds other than Liquid Funds, Money Market Funds	32	17	Low to Medium	Gold Exchange Traded Funds	23.50	8.50	High	Money Market Securities	15	0	Low

Aditya Birla Sun Life Financial Planning FoF - Prudent Plan/Aggressive Plan/Conservative Plan

- The Scheme returns can be impacted by issues pertaining to the NAV's of underlying Scheme of mutual funds where the Scheme has invested. These could be issues such as uncharacteristic performance, changes in the business ownership and / or investment process, key staff departures etc.
- Each plan has an allocation range within each asset class. The fund manager of the scheme has the discretion of active allocation to the asset class within the permitted range. This flexibility at times could impact the performance of each plan if the decision to allocate higher or lower percentage to an asset class does not go right. E.g. if the range for equities is 50-60%. In a rising market, 50% allocation and in falling market, 60% allocation to equities would result in lower returns.

Aditya Birla Sun Life Long Term Accrual Fund**Stock Selection Strategy**

The scheme would adopt a bottom-up approach to investing. The investment emphasis of the scheme will be in identifying companies with a strong competitive position in good businesses, and having quality managements. Essentially, the focus would be on long term fundamentally driven values. The fixed income investment strategy would emphasise investment in instruments that generate consistently superior yields at low levels of risk.

Portfolio Turnover

The scheme is open ended. It is expected that there would be a number of subscriptions and repurchase on a daily basis. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. However, a high turnover would not significantly affect the brokerage and transaction costs. This will exclude the turnover caused on account of:

- investing the initial subscription,
- subscriptions and redemptions undertaken by the unit holders

Aditya Birla Sun Life Low Duration Fund

The fund manager would primarily focus on long term growth for identifying stocks. The objective would be to identify business with superior growth prospects and strong management available at reasonable valuation and offering higher risk adjusted returns. The fund would follow blend of bottoms up approach (for stock selection) and top down approach (for sector allocation). The fund would follow flexi cap approach on market cap depending on risk return profile of various sub segments of the market. The decision to sell would be based on price reaching its fair value or availability of alternative investment opportunity offering higher risk adjusted returns or anticipated price appreciation no longer possible due to change in business fundamental.

Aditya Birla Sun Life Credit Opportunities Fund and Aditya Birla Sun Life MIP II - Wealth 25 Plan

The Scheme invests in Debt and Money Market Instruments and would seek to generate regular returns. The scheme also invests a portion of its assets in equity and equity related instruments to seek capital appreciation. The Scheme does not assure any returns

As per the asset allocation pattern indicated above, the Fund invests in various debt securities and money market instruments issued by corporates and/or state and central government. With the aim of controlling risks, rigorous in-depth credit evaluation of the instruments proposed to be invested in is carried out by the Investment Team of the AMC. The credit evaluation includes a study of the operating environment of the company, the past track record as well as the future prospects of the issuer, the short as well as long-term financial health of the issuer. The AMC is also guided by the ratings of rating agencies such as CRISIL, CARE and ICRA or any other rating agency as approved by the regulators.

In addition, the Investment Team of the AMC studies the macro economic conditions, including the political, economic environment and factors affecting liquidity and interest rates. The AMC use this analysis to attempt to predict the likely direction of interest rates and position the portfolio appropriately to take advantage of the same.

A top down and bottom up approach is being used to invest in equity and equity related instruments. Investments are pursued in select sectors based on the Investment Team's analysis of business cycles, regulatory reforms, competitive advantage etc. Selective stock picking will be done from these sectors. The fund manager in selecting scrips focuses on the fundamentals of the business, the industry structure, the quality of management, sensitivity to economic factors, the financial strength of the company and the key earnings drivers.

The Scheme may invest in other Scheme(s) managed by the AMC or in the schemes of any other Mutual Fund, provided it is in conformity with the investment objectives of the Scheme and in terms of the prevailing Regulations. As per the Regulations, no investment management fees will be charged for such investments. While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

Portfolio Turnover

Portfolio turnover is defined as lesser of purchases and sales as a percentage of the average corpus of the Scheme during a specified period of time. The Scheme being an open-ended scheme, it is expected that there would be a number of subscriptions and redemptions on a daily basis. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. Active asset allocation between equity and fixed income securities would impact portfolio turnover.

Aditya Birla Sun Life Income Plus

As the Scheme is an income scheme, the investment strategy will reflect the relatively conservative character of the portfolio. The fixed income investment strategy would emphasize investment in instruments that generate consistently superior yields at low levels of risk. Rigorous in-depth credit evaluation and analysis aimed at ascertaining both the short term financial health and long term solvency of the debt issuers will be carried out by BSLAMC's research team. In addition, criteria such as sound corporate managements, prospects of good future growth and strong past performance will be considered. Essentially, the focus would be on long term fundamentally driven values. However, short term opportunities would also be seized, provided they are supported by underlying values.

Aditya Birla Sun Life Gilt Plus - PF Plan**Portfolio Turnover**

Portfolio turnover will depend upon the circumstances prevalent at any time. Under normal circumstances the portfolio turnover is not likely to exceed 200%. This will exclude the turnover caused on account of:

- investing the initial subscription,
- subscriptions and redemptions undertaken by the unit holders.

Purchase and sale of securities attract transaction costs of the nature of brokerage, stamp duty, custodian transaction charges, etc. The above limit of portfolio turnover is essential to regularly explore trading opportunities to optimise returns for the Scheme and enable portfolio restructuring when required.

Liquidity Support from RBI

Being a scheme dedicated exclusively to investments in Government Securities, Aditya Birla Sun Life Gilt Plus will be eligible to avail, on any day, from RBI, liquidity support upto 20% of the outstanding value of its investments in government securities (as at the close of the business on the previous business day), under its guidelines issued vide circular DMC 2741/03.01.00/95-96, dated April 20, 1996. Liquidity support under these guidelines is available to reverse repurchase agreements in eligible Central/State government dated securities and Treasury Bills for all maturities.

Repos / Reverse Repos

The Scheme may undertake Repos / Reverse Repos as per the guidelines released by SEBI / RBI and subsequent modifications thereto.

Aditya Birla Sun Life Government Securities Fund - Long Term Plan

A portfolio invested in GSecs or state government securities is normally associated with an investment strategy in the debt markets that is free of credit risk (i.e. the risk of default by the issuer). Investments may also be made in the call market or in an alternative investment to the call market as may be directed by the RBI. Income may be generated through the receipt of coupon payments, the amortization of the discount on debt instruments or the purchase and sale of securities in the underlying portfolio.

The portfolios of the plans may differ in the portfolio allocation to a particular asset class and the issue held as well as in the duration of each portfolio. Long Term Plan will be managed to maximum rupee weighted duration of seven years. The investment plan will, under normal market conditions, invest its net assets as per the asset allocation hereunder. The Fund Manager will review the portfolio for adherence with the above rupee weighted duration norms and rebalance the same within 30 days to conform to the above limits.

It is the intention of the Scheme to avail itself of the liquidity support from the RBI extended to mutual funds dedicated to investments in government securities via circular DMC.No.2741/03.01.00/95-96 dated April 20, 1996 as amended from time to time. Further, non-Government Provident Funds, Superannuation Funds, Gratuity Funds and Pension Funds through its investments in government securities may invest in the Scheme.

Aditya Birla Sun Life Dynamic Bond Fund

The investment objective of this Scheme is to optimise returns for the investors by designing a portfolio, which will dynamically track interest rate movements in the short term by reducing duration in a rising rate environment while increasing duration in a falling interest rate environment. The investment strategy would revolve around structuring the portfolio so as to capture positive price movements and minimise the impact of adverse price movements.

Since active debt management strategies require an in depth knowledge of and ability to accurately track interest rate movements taking into account various micro and macro factors, it is difficult for an individual investor to adopt such a strategy. Whereas, the investment team of Aditya Birla Sun Life Mutual Fund, through its research and process driven investment strategy, would endeavour to capitalise on the available opportunities in a timely manner. The fund would seek to fulfill the needs of a large number of individual, HNIs as well as large institutional investors who are susceptible to interest rate risks.

In order to maximise returns the fund managers may look at curve spreads both on the gilt as well as the corporate bond markets to gain maximum value out of any security/s.

Aditya Birla Sun Life Constant 10 Year Maturity Fund

The fund focuses on enhancing the portfolio returns by identifying mispriced credit opportunities in the market and selectively investing in them. To enhance the portfolio returns, the Fund would invest in instruments that offer superior yield at acceptable levels of risk. To manage the credit risk, the Fund would invest predominantly in short and medium term securities. Moreover, the Fund has put in place a strong rigorous process to evaluate credit risk and monitor the same on a continuous basis. The Fund will also emphasise collaterals/covenants where it believes it is required. If and when the Mutual Funds are allowed to invest in credit derivatives, the Fund will also invest in such securities, in line with extent of the regulations.

The potential universe of the scheme for investment includes (but is not limited to) securities issued by NBFCs, ABS, Corporate Debt, Financial Institutions and Banking Sector Bonds & Treasury Bills, Govt. Of India Securities, State Government Bonds, Government Guaranteed Bonds, PSU Bonds, money market securities, Call Money, Commercial Paper, Certificate of Deposit & Discounted trade Bills.

Aditya Birla Sun Life Medium Term Plan

The Fund intends to optimise returns by keeping its portfolio duration between 1 year to 5 years. Depending upon prevailing market conditions & interest rate scenario the duration may be brought down below 1 year. In case of a rising interest rate environment the duration of the fund may be reduced and holding in money market securities could go up to 100% whereas in a falling interest rate scenario the holding in medium / long dated securities may be maximized.

Aditya Birla Sun Life Savings Fund**Stock Selection Strategy**

The investment emphasis of the scheme will be in identifying companies with a strong competitive position in good businesses, and having quality managements. The investment strategy would emphasise investment in instruments that generate consistently superior yields at low levels of risk.

Investment Securities

To achieve the scheme objective, the scheme will invest in a wide range of instruments including:

- Government of India Securities:
- Obligations of Public Sector Undertakings (PSUs) including bonds, debentures and certificates of deposit.
- Obligations of domestic public and private sector banks, and development financial institutions including bonds, debentures and certificates of deposit.
- Obligations of domestic corporations, including bonds, debentures, non-convertible portion of convertible debentures, securitized debt and promissory notes, pass-through obligations, commercial paper and structured obligations.
- Call money, fixed deposits of domestic banks or corporations, and other money market instruments, as permitted by SEBI.
- Other domestic instruments, listed or unlisted, as may be offered in the domestic market and permitted by SEBI.
- Derivatives and other investments permitted by regulations from time to time.

Within the defined asset allocation parameters, there are many ways in which a portfolio can be constructed. Any specific asset allocation will be made keeping in mind the contemporary realities in the economy, financial system, investment as well as investor outlook. Given below is specific representative instance.

Asset Class	Percentage Allocation (%)
Corporate Debt	35
PSU Bonds	15
GOI Securities	30
Money Market Instruments	10
Call Money	10
Total	100

Given the nature of the scheme, liquidity would be a key driver in the construction of the portfolio. The scheme may review the above pattern of investments based on views on interest rates and asset liability management needs. From time to time, it is possible that the portfolio may hold cash. However, at all times the portfolio will adhere to the overall investment allocation pattern as specified earlier.

Aditya Birla Sun Life Short Term Opportunities Fund

The fund focuses on enhancing the portfolio returns by identifying mispriced credit opportunities in the market and selectively investing in them. To enhance the portfolio returns, the Fund would invest in instruments that offer superior yield at acceptable levels of risk. To manage the credit risk, the Fund would invest predominantly in short and medium term securities. Moreover, the Fund has put in place a strong rigorous process to evaluate credit risk and monitor the same on a continuous basis. The Fund will also emphasise collaterals/covenants where it believes it is required. Aditya Birla Sun Life Treasury Optimizer Plan

The AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. As per the asset allocation pattern, the Fund invests in various debt securities and money market instruments issued by corporates and/or state and central government. With the aim of controlling risks, rigorous in-depth credit evaluation of the securities proposed to be invested in will be carried out by the investment team of the AMC. The credit evaluation includes a study of the operating environment of the company, the past track record as well as the future prospects of the issuer, the short as well as long-term financial health of the issuer. In addition, the Investment Team of the AMC studies the macro economic conditions, including the political, economic environment and factors affecting liquidity and interest rates. The AMC use this analysis to attempt to predict the likely direction of interest rates and position the portfolio

Aditya Birla Sun Life Corporate Bond Fund

The Scheme endeavors to generate returns by predominantly investing in corporate debt securities with short to medium term maturities across the credit spectrum within the investment grade. The scheme will be managed so that the maximum duration of the portfolio is capped at 4 years.

The Scheme would seek opportunities across the credit curve and would endeavour to take benefit from mispriced credit opportunities. The fund will avoid active duration management. In fact, the fund manager within the maximum permissible mandate would endeavour to match the maturity of the underlying portfolio with proposed investment horizon

The scheme shall not invest in government securities and State Developmental Loans but may invest in money market instruments including T-Bills, Repo and Reverse Repos & CBLO within the limits mentioned in asset allocation pattern. Rigorous in-depth credit evaluation and analysis aimed at ascertaining both the short term financial health and long term solvency of the debt issuers will be carried out before investing. In addition, criteria such as sound corporate managements, prospects of good future growth and strong past performance will be considered.

Aditya Birla Sun Life Short Term Fund

Aditya Birla Sun Life Cash Manager

The aim of the investment strategy is to provide stable returns by minimizing the interest rate risk in the short as well as long term. The Scheme aims to identify securities, which offer superior levels of yield at lower levels of risks. Liquidity will also be an important criterion and a reasonable proportion of the investment will be made in relatively liquid investments. In addition, the Fund Management team will study the macro economic conditions affecting liquidity and interest rates. The Fund Manager would use this analysis to attempt to predict the likely direction of interest rates and position the portfolio appropriately to take advantage of the same.

Aditya Birla Sun Life Floating Rate Fund - Long Term Plan

Floating rate debt issuance is a relatively new concept in India and has grown rapidly with the introduction and wide acceptance of benchmarks such as NSE MIBOR / Reuters MIBOR etc. The Government of India has also started issuing floating rate sovereign debt which is expected to give a major impetus to the pace of development of floating rate market in India. The scheme proposes to invest substantially in floating interest rate securities, fixed interest rate securities swapped for floating rate returns and fixed rate securities. The aim of the investment strategy is to generate stable returns by minimizing the interest rate risk in the short as well as long term.

The domestic debt markets are maturing rapidly with improvement in liquidity in various debt segments as a result of introduction of new instruments and investors. The development of derivatives markets particularly swaps and Forward Rate Agreements (FRA) have made the environment more dynamic and has provided opportunity to manage interest rate more actively.

The aim of the investment manager will be to allocate the assets of the scheme between various fixed interest rate securities and floating interest rate securities and use derivatives like swaps and FRAs effectively with the objective of achieving stable returns. The portfolio of the Long Term Plan will be normally skewed towards longer term maturities.

The scheme will endeavour to minimise interest rate risk. Fixed interest rate securities are subjected to volatility in price movements corresponding to movements in interest rates. However, the interest rate in case of floating rate securities is reset in regular time intervals based on certain benchmark or a reference rate (eg. NSE Mibor, T Bill Yield, Reuters MIBOR, etc.). Hence the prices of these securities are less sensitive to interest rate fluctuation leading to minimal interest rate risk in case of floating interest rate securities.

Floating interest rate securities market in India is in a developing phase. Government of India has started issuing Government securities carrying floating rate coupon payments. This will help the floating rate market to develop rapidly. A large number of corporates borrow their short term requirements and funds through floating rate instruments. However, as the markets develop corporates would start accessing the market for their long term requirement of funds at a floating rate.

In the absence of floating rate securities, the same can be created synthetically with a combination of derivatives like Interest Rate Swaps and FRAs and fixed interest rate securities. The fixed income derivatives market has developed considerably during the last 2 years in India. The scheme intends to use derivatives as permitted by RBI/SEBI for hedging interest rate risk.

The actual percentage of investments in various floating and fixed interest rate securities and position of derivatives will be decided after considering the prevailing political conditions, economic environment (including interest rates and inflation), the performance of the corporate sector and general liquidity as well as other considerations in the economy and markets.

Aditya Birla Sun Life Cash Plus**Portfolio Turnover**

Portfolio turnover will depend upon the circumstances prevalent at any time. Under normal circumstances the portfolio turnover is not likely to exceed 200%. This will exclude the turnover caused on account of:

- investing the initial subscription,
- subscriptions and redemptions undertaken by the unit holders.

Purchase and sale of securities attract transaction costs of the nature of brokerage, stamp duty, custodian transaction charges, etc. The above limit of portfolio turnover is essential to regularly explore trading opportunities to optimise returns for the scheme and enable portfolio restructuring when required.

Aditya Birla Sun Life Gold Fund

The investment objective of the scheme is to provide returns that tracks returns provided by ABSL Gold ETF. To achieve the investment objective, the scheme will predominantly invest in units of Aditya Birla Sun Life Gold ETF. Accordingly, the Scheme may buy/sell the units of ABSL Gold ETF either directly with the Fund or through the secondary market on the Stock Exchange(s). The scheme would also invest in debt & money market securities to the extent necessary to meet the liquidity requirements for the purpose of repurchases or redemptions.

The AMC shall endeavor that the returns of ABSL Gold Fund will replicate the returns generated by the underlying scheme and is not expected to deviate more than 2%, on an annualized basis net of recurring expenses in the Scheme. However, this may vary due to reasons beyond the control of the Fund Manager.

The deviation from the underlying ABSL Gold ETF as specified above shall mainly be on account of the receipt of cash flows which on an average takes 5 days given the existing operational procedure.

The table shows below the impact that could happen on fund performance as a result of delay in receipt of money considered from period of inception of ABSL Gold ETF till March 31, 2017.

% difference in NAV between 'n' days	2 days	3 days	4 days	5 days	6 days	7 days
Average	0.06	0.08	0.11	0.14	0.17	0.20
Max	9.36	8.66	8.66	11.10	12.26	12.30
Min	-10.72	-11.25	-11.25	-11.28	-12.64	-13.16

The above table is only for illustration purposes based on underlying assumption that deployment of entire corpus is delayed by no. of days mentioned above. However, in reality, as the deployment of subscriptions on an ongoing basis may not be significant in proportion to corpus of fund, the impact may not be material. Further, the deviations may normally be expected to average out over a longer time horizon.

The fund would endeavor to maintain the indicated asset allocation as mentioned above. However, there could be a variance in the asset allocation on account of receipt of cash flows, considering the existing operational procedure as explained hereafter

Aditya Birla Sun Life Global Real Estate Fund

The Scheme intends to predominantly invest in ING (L) Invest Global Real Estate Fund, Under normal market conditions, ING (L) Invest Global Real Estate Fund invests in a diversified portfolio of equities and/or other transferable securities (warrants on transferable securities – up to a maximum of 10% of the Sub-Fund's net assets – and convertible bonds) issued by companies established, listed or traded in any country worldwide and operating in the real estate sector. The Investment Manager will select companies whose main revenue or activity is linked to property, real estate management and/or development.

The Sub-Fund may also invest, on an ancillary basis, in other transferable securities (including warrants on transferable securities up to 10% of the Sub-Fund's net assets), money market instruments, units of UCITS and other UCIs and deposits as described in Part III of the prospectus. However, Investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on transferable securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets. All risks associated with such scheme, including performance of their underlying equity portfolio, derivative instruments, off-shore investments etc., will therefore be applicable in the case of the Scheme. In selecting investments, the Manager uses a rigorous portfolio construction process divided into two stages:

- Firstly, the Manager selects the sectors and regions in which to invest and determines the degree of representation of these sectors and regions by systematically assessing trends and conditions in the public and private real estate markets.
- Secondly, the Manager uses an assessment process developed by ING to identify investments which currently generate higher income and have higher growth potential than their peers. This assessment process examines various factors:
 - value and property;
 - capital structure and
 - management and strategy

Aditya Birla Sun Life Asset Allocator Multi Manager FoF Scheme

The scheme allocates investments dynamically between equity and debt/liquid/money market funds. The scheme invests in Money Market Securities as per the prevailing regulations from time to time, only for the purpose of liquidity requirements.

Aditya Birla Sun Life Active Debt Multi Manager FoF Scheme

The Allocation of funds between the different debt funds specified in the asset allocation pattern depends primarily on the interest rate outlook. When interest rates are expected to harden, the ideal combination of funds include those that have relatively low interest rate risk. Hence the portfolios have a higher weightage to the Liquid funds, Floating Rate Funds and Fixed-Maturity-Plans and other Debt Funds with average maturity less than 1-year.

Conversely, when interest rates are expected to ease, the fund seeks to generate higher returns by higher weightage to Debt funds which have average maturity more than 1 year.

The direction of the interest rates are determined through consideration of the following factors:

- RBI stance of Monetary Policy
- Inflation rate and expectations of movement in the Inflation rate
- Economic growth
- Banks commercial credit demand growth versus banks' deposit growth
- Movement in interest rates among Other major economies

Based on the above factors and the relative strength of each of the factors, the Multi Manager investment team assesses the level of interest rate exposure which the portfolio should bear and accordingly calibrate the allocation to the funds in line with the allocation range specified above.

Aditya Birla Sun Life Global Commodities Fund

The corpus of the Scheme will be invested into units of global mutual funds which invest in commodity related securities. Whilst our overall intention is to create a FoF Scheme which seeks to outperform the customized benchmark for the Scheme i.e. 40% Dow Jones World Basic Materials Index + 40% Dow Jones World Oil and Gas Index + 20% MSCI AC World in INR terms, over rolling 12 months periods, the individual funds selected may not have the same benchmark as our product. An example of this is possible selection of a Global Mining or Global Resources Fund which also invests purely in commodities related securities, but which may have a more restricted benchmark. This may be appropriate from time to time to our overall strategy to create a FoF Scheme which is able to fulfill its objective.

Fund Selection Strategy

The Scheme will invest in units of global mutual funds which invest in commodity related securities. These funds will be selected with a view of outperforming the investment objective of the fund (benchmark). The fund selection process reflects the Aditya Birla Sun Life AMC investment process, which seeks to look at combining/blending funds together to create a risk-adjusted solution which is optimal for investors in this asset class. The key determinants in fund selection are;

- Track record of the fund relative to its benchmark;
- Appropriateness of the fund relative to Aditya Birla Sun Life Global Commodity Fund's objective;
- Quality of the fund management team; and
- Reputation of the AMC which has launched the scheme.

The Aditya Birla Sun Life AMC investment process has a history of being able to identify appropriate mutual funds for investment and construct portfolio with the aim of providing a sound risk-adjusted solution in comparison to the outperformance objective.

Aditya Birla Sun Life Financial Planning FoF - Prudent Plan/Aggressive Plan/Conservative Plan

Target allocation across plans for each asset class:

Instruments	Conservative Plan	Prudent Plan	Aggressive Plan
Equity funds	20.00%	40.00%	70.00%
Liquid Funds, Money Market Funds	44.00%	30.00%	15.00%
Debt Funds other than Liquid Funds, Money Market Funds	24.00%	20.00%	10.00%
Gold ETFs	12.00%	10.00%	5.00%

BSLAMC typically selects underlying Scheme and allocate to them as per the defined investment process across each asset class.

Then as per the asset allocation in each plan of the product, the portfolio is replicated.

e.g. For Conservative Plan, 20% of the plan will be allocated to a portfolio of equity Scheme, 44% of the plan will be allocated to a portfolio of liquid funds / money market funds, 24% of the plan will be allocated to debt funds and 12% to gold ETFs.

An investor, depending on his risk profile, could choose a plan.

The investment team would rebalance the plans at periodic intervals. The rebalancing period would be determined by the permitted allocation range, market conditions, inflows / outflows from the plan.

RISK CONTROL

Aditya Birla Sun Life Long Term Accrual Fund, Aditya Birla Sun Life Low Duration Fund, Aditya Birla Sun Life Credit Opportunities Fund, Aditya Birla Sun Life MIP II - Wealth 25 Plan, Aditya Birla Sun Life Income Plus, Aditya Birla Sun Life Government Securities Fund - Long Term Plan, Aditya Birla Sun Life Constant 10 Year Maturity Fund, Aditya Birla Sun Life Short Term Opportunities Fund, Aditya Birla Sun Life Treasury Optimizer Plan, Aditya Birla Sun Life Short Term Fund, Aditya Birla Sun Life Cash Manager, Aditya Birla Sun Life Floating Rate Fund - Long Term Plan, Aditya Birla Sun Life Floating Rate Fund - Short Term Plan & Aditya Birla Sun Life Cash Plus

Since investing requires disciplined risk management; in order to protect the interest of investors, Aditya Birla Sun Life AMC would incorporate adequate safeguards for controlling risks in the portfolio. As a prudent measure, Aditya Birla Sun Life AMC has broad internal investment norms and investments made by the scheme would be in accordance with the investment objectives of the scheme and provisions of SEBI Regulations. Where required, Scheme specific guidelines are also in place.

Concentration risk is mitigated by defining issuer level limits. The Investment Committee is an overseeing body for the performance and the risk indicators of the portfolios of the respective Schemes.

Rigorous in depth credit evaluation of the issuers proposed to be invested, will be conducted by the Investment team. As part of credit evaluation, a study on the operating environment, past track record as well as future prospects of the issuer, short as well as long term financial health of the issuer. Aditya Birla Sun Life AMC will be guided by the ratings of accredited agencies such as CRISIL, CARE, ICRA etc and the internal credit policy which defines the norms for credit exposure and the approval authorisation matrix.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

Aditya Birla Sun Life Gilt Plus - PF Plan, Aditya Birla Sun Life Dynamic Bond Fund, Aditya Birla Sun Life Medium Term Plan & Aditya Birla Sun Life Corporate Bond Fund

Investments made by the scheme would be in accordance with the investment objectives of the scheme and provisions of SEBI Regulations. Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. The risk control process involves reducing risks through portfolio diversification, taking care however not to dilute returns in the process. The AMC believes that this diversification would help achieve the desired level of consistency in returns. The AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. With the aim of controlling risks, rigorous in-depth credit evaluation of the securities proposed to be invested in will be carried out by the investment team of the AMC.

The Scheme may also use various derivatives and hedging products from time to time, as would be available and permitted by RBI, in an attempt to protect the value of the portfolio and enhance. Unitholders' interest.

It is proposed to manage the risks by placing limit orders for basket trades and other trades, proactive follow-up with the service providers for daily change in weights in the respective indices as well as closely monitor daily inflows and outflows to and from the Fund.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

Aditya Birla Sun Life Savings Fund

The overall portfolio structuring would aim at controlling risk at a moderate level. Both very aggressive and very defensive postures would be avoided. Fixed income security specific risk will also be managed through broad diversification of the portfolio within the framework of the above mentioned investment objective and policies. Macroeconomic risk will be addressed through focused and ongoing review of relevant business and economic environment. All efforts will be made to protect the NAV of the scheme and the interest of the unit holders.

Investment in debentures and bonds (where the tenure exceeds 18 months) will usually be in instruments which have been assigned at least investment grade ratings by leading credit rating companies such as The Credit Rating Information Services of India Ltd. (CRISIL), Investment Information and Credit Rating Agency (ICRA) or Credit Analysis and Research (CARE) or any other approved agency. When any existing fixed-income investment is downgraded, efforts will be made towards quickly selling it off.

Investments in debt instruments shall have a relatively low risk, and those in money market instruments shall have even lower risk profile. Liquidity will be a very important consideration for investment decisions, due to the potential of large redemption inherent in open ended schemes. As a result, a reasonable proportion of the scheme's investments will be made in relatively liquid investments.

BSLAMC may, from time to time, review and modify the Scheme's investment strategy if such changes are considered to be in the best interest of the unit holders and if market conditions so warrant. Investments in securities and instruments not specifically mentioned earlier may also be made, provided they are permitted by SEBI.

Aditya Birla Sun Life Gold Fund

Investments made by the Scheme would be in accordance with the investment objectives of the scheme and provisions of SEBI (MF) Regulations. Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. The AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants.

Risk mitigation measures for Portfolio Volatility: Gold ETFs being passively managed carry lesser risk compared to active management. The underlying ETF scheme where the fund intends to invest follow the underlying price of gold which is valued as per SEBI norms and therefore the level of portfolio volatility would be same as that of the underlying gold price. There may not be additional volatility on account of fund manager decision. The Fund Manager would also endeavour minimal cash levels to keep performance deviation from the underlying ETF to minimal.

Risk mitigation measures for Managing Liquidity: Gold ETFs invest in physical gold which satisfy the norms of 'Good Delivery' as defined by London Bullion Markets Association. Liquidity issues are not envisaged as gold is a globally traded commodity and thereby very liquid. There are also designated Authorised Participants who facilitate liquidity on the exchange.

Risk Mitigation Measures for Tracking Error:

Sources of Tracking Error	Mitigation Measures
The trade execution prices may be different from Closing NAV of underlying scheme (BSL Gold ETF).	The execution price of BSL Gold ETF will be a factor of demand/supply on the stock exchange. The difference tends to average out over a longer time horizon and that will moderate tracking error
Delay in the purchase or sale due to market illiquidity	The AMC appoints leaders in bullion business as Authorized Participants/Market Makers to enhance liquidity on the stock exchange and reduce the impact cost and that will help the fund to minimize tracking error
Funds flows in BSL Gold Fund of value lesser than Creation lot size of underlying scheme.	For small amounts of inflows/outflows which are less than the creation size of BSL Gold ETF, the BSL Gold Fund will buy/sell units of underlying scheme directly on the stock exchange without waiting for additional subscription / redemption to minimize tracking error.
Availability of Gold bars for creation of BSL Gold ETF.	The AMC makes arrangements with leading bullion banks/dealers to make gold bars available for creation of underlying scheme (BSL Gold ETF) and that in turn will help minimize tracking error.

Sources of Tracking Error	Mitigation Measures
Delay in realization of unit holder's funds	The inputs regarding cash flows by various modes of acceptance will be estimated on a daily basis by the fund. The subscription/redemption request will also be reported and used as a basis for planning investments in BSL Gold ETF. The deployment will be carefully planned on the basis of the mode of acceptance of instrument to moderate tracking error.
Holding of cash equivalents to meet redemptions, recurring expenses etc.	The Fund will keep offsetting the expenses/interest against the net inflows/outflows and keep investing/redeeming the balance amount from BSL Gold ETF to minimize the tracking error in best interest of investors.
Transaction cost (including taxes and insurance premium) and recurring expenses	The Fund seeks to keep it to the minimal to reduce the impact of the tracking error.
Execution of large buy / sell orders	These deals are done at best possible prices available at the time of investments. Distortions, if any would automatically get corrected over periods of time.
The potential for trades to fail, which may result in the Scheme not having acquired gold at a price necessary to track the benchmark price.	Units procured through exchanges have an auction process inbuilt into them, and hence the aforesaid risk is automatically mitigated. Even for lot size purchases, the fund deals with multiple reputed banks/ authorized participants where the probability of default in trades is remote.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.
